

Watergun, heavy duty model, small / brass

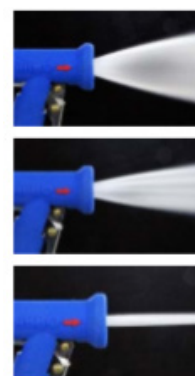

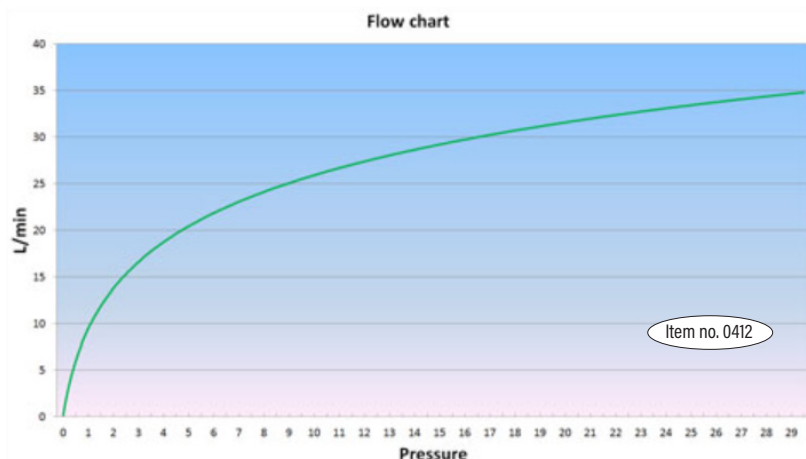

Item no. 0412

With its low weight and its compact dimensions it is particularly easy to handle. The velvety soft rubber surface adds to the comfort.

The nozzle has the new revolutionary flat FBK design, which provides a perfect spray pattern without dripping. Due to the exactly positioned nozzle tip, there is a very equal distribution of water, wherein with the trigger the shape of the jet can be changed easily from a wide cone to a narrow point. In addition the orifice is dimensioned such that the gun uses at least 26% less water than a regular cleaning gun. It also has a great cleaning power by its strong jet.

Despite its low weight and compact dimensions, the water gun is extremely durable thanks to its rugged construction, sturdy hinge joints, strong materials and dual internal seals.

Adjustable spray angle

Specifications	Item no. 0412
Body material	Brass CuZn36Pb3
Lever and pusher	St.st. X5CrNi18-10 (AISI 304)
Nozzle shaft and spring	St.st. X5CrNiMo17-12-2 (AISI 316)
Rubber protection	EPDM
Seals	EPDM (FDA)
Inlet connection	½" BSP female
Maximum temperature	95 °C
Maximum pressure	25 bar
Flow at 4 bar	19,0 l/min
Weight	463 g
Size	145 x 94 x 45 mm

*** Although all used materials can withstand temperatures up to over 100°C, it is strongly recommended to take special precautions when using hot water
